Data Visualization with Power BI and Tableau

Module - I

Practical – III

Roll No.:T054	Name:Priti Yadav
Class:TYIT	Batch:2
Date of Assignment: 14/08/26	Date/Time of Submission: 14/08/26

3.Creating Advanced Visualizations in Tableau

a)Create stacked and grouped bar charts for comparison

Steps:

Open Tableau and connect customer_shopping_behavior dataset.

Create a New Worksheet.

Drag Category → Columns.

Drag Frequency of Purchases → Columns, next to Category.

Drag Purchase Amount → Rows.

Select Bar from the Marks card.

Drag Frequency of Purchases → Color.

OUTPUT:-

stacked and grouped bar charts

Priti Yadav T054

b) Build treemaps and pie charts for part-to-whole analysis

Steps:

Open a New Worksheet.

Drag Category → Label.

Drag Purchase Amount (₹) → Size.

Drag Purchase Amount (₹) → Color.

Select Treemap.

OUTPUT:-

treemaps for part-to-whole analysis
Priti Yadav T054

Steps:

Drag Gender → Rows.
Select Pie from Marks.
Drag Category → Color.
Drag Purchase Amount → Angle.
Drag Purchase Amount → Label.
Select Pie-chart.

OUTPUT:-

c) Design scatter plots to identify relationships

Steps:

Drag Age → Size.
Drag Item Purchased → Label.
Drag Festival/Sale → Label.

Drag Purchase Amount → Color.

Click Size → Pack Bubbles.

Adjust the Size slider to get the required bubble size.

OUTPUT:-

Design scatter plots

Priti Yadav T054

d) Create dual-axis and combination charts

Steps:

Drag Purchase Date → Columns.

Drag Purchase Amount (₹) → Rows.

Drag Quantity → Rows.

OUTPUT:-

dual-axis

Priti Yadav T054

e) Develop histograms for distribution analysis

Steps:

Right-click Purchase Amount (₹) → Create → Bins.

Keep the default Bin Size and click OK.

Drag Purchase Amount (₹) (bin) → Columns.

Drag Purchase Amount (₹) → Rows and change it to CNT (Count).

OUTPUT:-

Histogram

Priti Yadav T054

f) Build box-and-whisker plots.

Steps:

Drag Purchase Amount (₹) → Rows.

Drag Discount (%) → Rows below it.

Click Show Me → Box-and-Whisker Plot.

OUTPUT:-

box-and-whisker plots

Priti Yadav T054

g) Use Gantt charts and advanced date visualizations

Steps:

Drag **Purchase Date** → Columns.

Drag Item Purchased → Rows.

In Marks, select Gantt Bar.

Drag Purchase Amount (₹) → Size.

Drag Category → Color.

Give the title “Gantt charts Priti Yadav T054”

OUTPUT:-

Gantt charts

Priti Yadav T054

CONCLUSION:

This practical successfully demonstrated the use of Tableau for creating advanced data visualizations using the customer shopping behavior dataset. Various charts such as bar charts, treemaps, pie charts, bubble charts, dual-axis charts, histograms, box-and-whisker plots, and Gantt charts were created. These visualizations helped in understanding purchase patterns, category-wise comparisons, data distribution, relationships, and trends in a simple and effective way.
